

T5 Digital LED Infrared Thermometer Gun Non-contact Quick Temperature Measurement

Model: T5

T5 Specifications:

Measuring range: body temperature 32.0 C ~ 42.9C.

Accuracy of measurement: human body (+0.2 C) object (+1 C)

Product size: 30mm *44mm *152mm

Packaging box size: 175 mm*72 mm*47 mm

Memory Storage: 32 Data Memory

Gross Weight: 190g

Batteries: AAA, 1.5V battery x 2 (not included)

Product key Features:

Features three measuring modes, forehead, ear and body temperature measurement. Backlight LCD display, LED high brightness tricolour backlight! Fever alarm function prompts that the measured value is greater than 38.0 C degrees.

Additional features:

1. Accurate measurement: measurement deviation < 0.2 degrees. (German Infrared Detection System)
2. Fast temperature measurement: measuring time is less than 1 second.
3. Easy to use: one key measurement, easy to operate.
4. Non-contact: measuring human forehead without touching human skin.
5. Service life: Install 2 batteries of No. 7, which can be used more than 20,000 times, and the service life of the product is more than 40,000 times.
6. Measuring distance: It can be adapted within 5 – 15CM without fixed measuring distance.
7. Large screen display: Large screen LCD display, any light can be clearly displayed.
8. Adjustable Temperature alarm.
9. Storage data: 32 measurements are stored to facilitate analysis and comparison.
10. Unit Conversion: Use Celsius and Fahrenheit to convert each other. (Press the memory key for about 6 seconds to stop when the shutdown state is long. After automatic shutdown, the reboot will be set up successfully!
